## **DETAILED ACTION**

### ***Claim Objections***

Claim 1 is objected to because of the following informalities: on line 12, the word "pivotally" should be replaced with the word --rotatably--. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Skowronski (U.S. Patent Application Publication No. 2003/0000788).

With respect to Claims 1-4, Skowronski, Figures 1-3, teaches a wire winding device comprising a hollow housing defining a receiving space and having a through hole in communication with said receiving space, said through hole being adapted to permit extension of the electrical wire 16 there through and having a first side and a second side that are opposite to each other; a winder mounted within said receiving space; a first roller 41 pivotally connected to said housing.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
